Characteristics Flavor

- ✓ Special Arrange : YiLing Cuisine, XingShan Cuisine, ShenNong Cuisine, WuDang Cuisine, XiangYang Cuisine, HuBei Cuisine

The Shennongjia Nature Reserve.

In 2013, it was approved as Shennongjia Global Geopark. Afterwards, it was listed as a world heritage by the UNESCO in 2016. Because of its marvelous natural scenery, rare foliages, endangered animals and famous legends such as the mysterious "Wild Man" (Chinese Yeti) said to be found in the mountains, the forest zone has attracted many tourists every year, amongst whom are researchers and scientists.

Most beautiful road on water, to avoid destroying a forest, authorities have built a 10.9-kilometer road linking Gufu to Zhaojunqiao in Xingshan county, Central China's Hubei province, that completely bypasses the nearby mountain. Two stretches of the project are two bridges, altogether 4.4km, built over two rivers.

"The Natural Bridge" is a landscape of karst topography. It is a geological arch formed by the dissolving action of water on the lower parts of soluble rocks. The distance from the bridge surface to the water surface is about 120 meters.

Xiling Gorge is full of shoals and rapid currents. The most dangerous shoals are Xietan, Qingtan and Kong Ling, collectively known as the Three Shoals of Xiling. Among all the dangerous shoals, Qingtan Shoal and Kongling Shoal are the most famous.

Hubu Alley or Hubu Lane is located in Wuhan (a famous historical and cultural city), Hubei Province of China. It is a popular point of interest of Wuhan city for both the local and tourists. This alley is a century-old lane in 150 meters Long, known as the "top first lane of Chinese flavor snack".
